EXCELLENCE IN CONCRETE PROTECTION

- Spray-Lock Concrete Protection® SCP 743 is a Colloidal Nano Silica product.
- Spray applied system that is engineered to penetrate up to 120mm of 25 MPa concrete, depending on porosity.
- Purges contaminants within the concrete and fills the capillaries.
- Applied to Green or Existing Concrete structures or components.
- Protects embedded reinforcing steel.
- Rejuvenates concrete capillary and pore structure.
- Improves resistance to chemical and environmental attack.

GUARANTEED TO SAVE YOU MONEY!
